Text Search For Solid Edge

Introduction: The Text Search App can be used to search for text in a Draft document in Solid Edge.

Text Search can be called from a ribbon bar button and the word to search can be specified from a standard search dialog commonly found in text editors and word processors.

[Watch Video](#)

Working:

1. Specify the single word or multiple words with spaces to search.
2. Select various options like:
 - Match Case
 - Search Working Sheets
 - Search Background Sheets
 - Search 2D Model Sheet
 - Search Balloons and Callouts
3. Click the Find button.
4. Then click the Find Next button repeatedly.
